• PROFILE

Multi-talented human. Most of my time I design, code and animate.

I'm also a multi-disciplinary maker with experiences in a wide range of design disciplines, with an interest in animations, music enthusiast, traveler, avid biker and more.

• SKILLS

I have experience working as a Full stack developer, have worked with the MEAN stack, currently developing in Laravel and Vue. I also have experience with UI/UX design, user testing and SEO. I also have a passion for bringing animation into websites, creating scrolling stories and rich user interactions.

JavaScript	PHP
Vue	Laravel
Vuex	Tailwind
CSS	Blade
SASS	
Animations	Cypress
GreenSock	Jest
WebGL	Unit Testing
Three.js	TDD
Canvas	
SVG	
Sketch	
Invision Studio	
Photoshop	Product design
Illustrator	Branding
InDesign	Logo making

• WORK EXPERIENCE

Flyhjaelp ApS

July 2018. - Present

Full Stack Laravel & Vue developer

I was part of a team of 5 that maintained and further developed 2 products (Flyhjaelp and iClaimer). I started as a junior developer, expanded my knowledge and became a Full stack developer. At the time there was no assigned designer in the team, and considering my education, I saw an opportunity for me to further develop myself. Thus, I am currently also the lead Designer in my team, being in charge of all the process of research, creating prototypes, sketches and mockups.

• Flyhjaelp.dk. (boarding website)

Redesign, resulted in increased conversion rate

Switched the code base to a custom CSS framework that I build from ground up

• iClaimer.com (internal dashboard)

Improved the usability by rethinking the data displayed and its purpose, conducted internal user tests and improved based on results.

Implemented a UI documentation for UI components (e.g colors, typography, shapes) and VUE components (e.g buttons, modals, images, containers)

Implemented a major integration with Try Denmark. Later on, this resulted in the creation of an automated transfer of data essential inside the dashboard

Transitioned the dashboard into a single page application using Vue & Vuex

→ **Tech Stack & Tools :** Laravel, Vue, Vuex, SASS, Tailwind, TDD, Sketch, Photoshop

KEA

Dec 2016 - May 2018

Teaching assistant / Tutor

Tutoring at KEA proved to a great opportunity for me to further solidify my knowledge by sharing it with others (considering I was in my final study year in that period) . Tutoring meant sitting down with students from all stages of the education I was following and helped them with their school projects, further understand certain topics or helped them pickup

Superb ApS

Jan 2017 - April 2017

Graphic Designer

I produced SoMe content in a young startup environment.
